Lahiru Indusara Edirisinha

Profile

Final-year Computer Science undergraduate with a strong foundation in software development and problem-solving. Completed Software Engineering training and currently working as an Assistant Software Engineer, gaining hands-on professional experience. Skilled in front-end and back-end development with expertise in Google Cloud, Firebase, AWS, and VPS. Passionate about building scalable, efficient, and secure software solutions.

Skills

Programming Languages

- Java
- Go
- Python
- JavaScript
- TypeScript
- sql

Frontend Development

- React.js
- Tailwind CSS

Databases & Tools

- MySQL
- PostgreSQL
- Firestore
- Git/GitHub
- Docker
- Postman

Backend Development

- Spring Boot
- Express.js
- Gin

Cloud & DevOps

- AWS (EC2, S3, Lambda)
- Google Cloud
- Firebase (Auth, Firestore, Hosting)
- VPS Deployment

Soft Skills

- Problem solving
- Team work
- Quick learner
- Attention to details
- Project management
- Leadership
- Time management

Projects

Gem Auction REST API

Developed a backend auction marketplace platform using **Go, Gin, GORM, and PostgreSQL**, with features including **user/seller/admin modules, real-time bidding via WebSockets, payment integration, media storage, livestream support, and role-based access control**.

Education

Graduate Diploma in Software Engineering, Institute of Software Engineering (IJSE)

BSc (Hons) Software Engineering, ICBT Campus

Professional Experience

Associate Software Engineer,
Boswin Group (Private) Limited
05/2025 – Present | Kollupitiya

Software Engineering Internship,
Boswin Group (Private) Limited
11/2024 – 04/2025

IT Assitance,
Softlogic Holdings PLC
2021

- After O/L

HR & Payroll Management REST API
Built a Spring Boot HR and Payroll backend with modules for employee management, attendance, leave, payroll, payslips, notifications, and secure authentication using JWT, MySQL, Firebase, WebSocket, and Swagger.

Telemedicine Appointment and Consultation Management System
Developed and maintained a telemedicine REST API for a healthcare platform that connects patients, doctors, and administrators. Built core backend modules for user authentication, appointment booking, scheduling, video consultations, real-time messaging, payment processing, notifications, and digital prescription/workflow management.

Medical Advisor Chatbot
Built a Python chatbot that uses spaCy NLP and rule-based symptom analysis to recommend specialists, detect emergency cases, and book doctor appointments through REST API integration.
